

# ELIMINATOR CAST IRON PLUG

## Application

### Self-Setting Bridge Plug

The Eliminator bridge plug is a drillable cast iron plug designed to set itself eliminating the need of a conventional setting tools. It provides wellbore zonal isolation for single or multi-zone purposes. Running in hole by electrical wireline or slickline with trigger, Eliminator bridge plug create their own internal force to provide a secure set, all on its own.

## Features and Benefits

- Only 24.5" long for 4-1/2" to 7" size; and 20" long for 2-3/8" to 3-1/2" size
- No redress time, less cost or risk
- Safer with no manual bleed-off at the surface
- Widely used for plug and abandonment (P&A) operations

## Run History in Thailand

- 100% Successful Installation for offshore P&A operation
- More than 20 set in 7" casing on current campaign with ZERO issue.

## Tool Specification

Casing/ Tubing Size (inch)	Casing / Tubing Weight (lb/ft)	Casing / Tubing ID (inch)	Run OD of Plug (inch)	Pressure Rating (psi)
2-3/8	4.0 - 6.2	1.853 - 2.041	1.710	9,300
2-7/8	6.4 - 8.6	2.259 - 2.441	2.160	10,100
3-1/2	7.7 - 10.2	2.922 - 3.086	2.750	13,000
4-1/2	10.5 - 15.1	3.826 - 4.052	3.580	10,000
5	23.2 - 24.1	4.000 - 4.044	3.580	10,000
5	11.5 - 13.0	4.494 - 4.560	4.424	10,000
5-1/2	14.0 - 26.0	4.548 - 5.012	4.424	10,000
7	20.0 - 32.0	6.094 - 6.456	5.910	10,000
